CANTRAIN Awards' Programs: The 2023-24 Application

Process

CANTRAIN administered the programs with 3 other CTTs in CAN-TAP-TALENT, CBITN and StrokeCog: [Studentships](#) [Fellowships](#) [Internships](#).

149 applications have successfully navigated the portal and submission process, then transferred to reviewers from all across Canada for the next 4 weeks following evaluation grids specifically adapted to master, doctoral and post-doctoral applicants. We shall report details to profile all EDIA and other principles next month and thereafter results will be revealed in September for 82 awardees.

Next year 2024-25 will be launched by **June 2024**. A better, wider process of marketing and dissemination of offers will be enabled starting January 2024.

CLINICAL RESEARCH PROFESSIONALS INTERNSHIPS

Clinical Research Internships for Clinical Research Professionals

CANTRAIN Internships' Programs: The 2023-24 Application Process

First of four internships programs. We shall launch the first one by September 1st for CRP (Clinical Research Professionals), Residents, Fellows and ECR (Early Career Investigators). The program will engage several CTTs working together via CANTRAIN portal and therefore a number of models will be proposed:

1. Half to full day awards to protect time to access training programs and exchange with mentors from across Canadian academic/health sciences centers/institutes to enable collaboration, and exchanging information on real-world conduct of clinical trials: [CRP Internships](#);

2. The second model is to enable on-site exchanges (travel in-person to participating sites) for one to four weeks practicum.

To continue to deliver on the promise of training and mentoring the next generations of CRP and Trialists, CANTRAIN will be launching an opportunity with industry for graduate and postgraduates' students for an immersive internship/practicum of 4 months and generous financial support. Launch September 22, 2024: [Graduate Students Internships](#).

Second, while the demonstration project is taking place, we are devoted to the development of the level 1 of each stream what is, at the same time, exciting and challenging as a large committee including people from across Canada meets to discuss every single week: wecantrain.ca/CTTP.

CLINICAL TRIALS TRAINING PROGRAMS

APPLICATIONS ACCEPTED STARTING SEPTEMBER 5th , 2023

Find the best clinical trial training program for you

For Graduate & Postdoctoral Trainees (GPT) in the health sciences

For Clinical Research Professionals (CRP)

For Trialists

For Community Partners

CANTRAIN Clinical Trials Training Programs: Applications Accepted Starting September 5, 2023

Although July tends to be associated to holidays, we have not stopped working; moreover, we have made some exciting advancements. To start with, we concluded the assessment of the demonstration project and we are using the evidence we collected to improve the Core Programming that will be launched at the end of September. At the same time, the curriculum development continues within each stream, the mentorship programs, studentship awards and more to come in the fall with the GPT Stream training, and specific for awardees and internships' Learners.

To foster a productive discussion that takes into account the comments and suggestions of the PanCanadian members who meet weekly and the subject expert from each stream, a selected team of professionals that includes the national coordinators, the content developer and designer, a clinical research educator, and the stream training national director will sit together in a retreat. Actions taken will be revisited and future steps will be settled: wecantrain.ca/CTTP. Have a great holiday for everyone.

More to come!

CANTRAIN & Partnering CTTs: Upcoming Event as First Annual Meeting February 12-15, 2024 in Montreal Winter Wonderland

CANTRAIN and partners Clinical Trials Training Programs (CTTP) Conference will bring together a truly multidisciplinary group of experts in clinical trial planning, execution, and analysis. Contribute your perspective

and discuss both the common and unique challenges and opportunities for innovation to meet patients' needs through protocol design. CANTRAIN's Real-World Evidence Training will explore new, innovative modules and levels for many streams of individuals and deliver cutting-edge insights to leverage this knowledge to advance clinical trials operations.

CANTRAIN Partners in Movement

CANTRAIN thanks Dr. Michael J. Strong for his completed term of five years as CIHR President and wishes him the best of luck in his ALS research program.

CANTRAIN congratulates: Dr. Souvik Mitra for his move to British Columbia from Nova Scotia. He will now be Associate Professor of Pediatrics at the University of British Columbia, Neonatologist for the BC Women's Hospital in Vancouver, and Clinician-Scientist at the BC Children's Hospital Research Institute.

Pr. Linda Li is becoming the new scientific director of the BC SUPPORT Unit. Best wishes in this additional mandate!

CANTRAIN Partners & Funders

CANTRAIN is primarily funded by CIHR. The RI-MUHC is leading the CTPP engaging 15 academic institutions & centers all over Canadian provinces. CANTRAIN has signed MOU with Research NB, Research Manitoba, SHRF and CTBC to co-fund the awards programs for recipients in those provinces and one of the internship program. Visit: [Funding Partners](#)

The list of all CANTRAIN Principal and Co-Applicants and partnering institutions can we found here: [Members Partners Co-funders](#)
